General Information

ID Pick up Tools (Manual)

This **manual ID pick-up tool** is making for **25mm ID dimension** for HDD Substrate. This pick up tool has a simple design yet with effective pick-up function.

The ID pick-up tool is made from **stainless steel material** which able to withstand stringent working condition, even at *acidic base slurry*.

The header material is a machining part with **smooth surface design**, the operator will pick up the NPP disc *without scratching the polishing pad*. In addition, a small curvature of the header will *hold the disc tight*.

ID Pick-up Tool Design

Features

- Suitable for ID = 25mm NPP substrate
- Stainless steel body to withstand acidic working condition
- Stainless steel screw to withstand acidic working condition
- Ergonomic reverse-tweezers design
- Smooth header to avoid scratching the pad surface
- Header curvature to promote holding ability

Maxwaytec Engineering Sdn. Bhd. is a Malaysia company providing engineering solution for industry application. We have an intense tooling design and fabrication ability for providing customer the suitable fixtures and tools.

Feel free **contact Maxwaytec Engineering**, and we are here to serve you better.
